OUR PHILOSOPHY

At Doctor Style Clinics, we believe aesthetic medicine and wellness treatments should enhance, never alter. Our aesthetic treatments are thoughtfully tailored to refine your natural features, restore confidence, and deliver elegant, harmonious results through the highest standards of medical care.

Alongside our aesthetic services, our regenerative wellness therapies harness the body's innate healing potential, supporting cellular renewal, recovery, and overall well-being from within.

MEET THE FOUNDER

DR. NIHAAL AFFAN

With countless options available, I know how overwhelming the beauty industry can be. That's why I have made it my mission to simplify your skincare journey—eliminating the guesswork and offering only the most effective solutions tailored to your needs.

I am honored to be part of your skincare story. Whether you visit our clinics or incorporate NA Skin into your daily routine, know that you are in expert hands.

Every treatment at Doctor Style Clinics, and every product in NA Skin is a reflection of my unwavering commitment to quality, efficacy, and innovation. For over a decade, I have dedicated my career to the art and science of dermatology, light-based treatments, and wellness refining my techniques, researching the most effective treatments, and curating skincare solutions that deliver real, lasting results.

I am privileged to share my growth journey with a family-like team of talented Doctors, therapists, and administrators whom helped build this brand with me for more than 13 years and helped thousands of clients with their Journeys.

WHY CHOOSE US?

Safety First: No Black-Market Materials

Every product and material is sourced exclusively from licensed, official suppliers. We never compromise your health or safety by using black-market or unregistered products—ever.

Fair Pricing, Honest Practice

Transparent pricing. No hidden charges. We may not be the cheapest, but we never compromise on safety. We use 100% genuine products, administered by licensed practitioners.

Results That Speak For Themselves

With a 96% client satisfaction rate, we're proud of the impact we make and remain committed to listening, improving, and delivering exceptional care.

Empowered Team, Empowered Clients

We work tirelessly to foster a positive workplace built on fairness, respect, and employee wellbeing. We believe the friendly team and cozy atmosphere our patients often mention are a reflection of that culture.

A Family-Run Clinic, Built on Connection

Our clinic is proudly family-run, with siblings leading the practice and a close-knit team that includes husbands and wives, and brothers and sisters—creating the warm, welcoming environment we're known for.

Celebrating Diversity, Every Day

Our multicultural team represents more than 10 nationalities and speaks over 10 languages, allowing us to provide personalized care to a diverse community.

Women-Led Excellence

Proudly women-led, 75% of our team is made up of women. We are committed to empowering women within our workplace and beyond.

Licensed & Fully Compliant

Doctor Style Clinic operates in accordance with all DHA and MOH regulations, maintaining the highest standards of safety, hygiene, and professionalism.

A person wearing black gloves is adjusting a white sheet. The background is a light gray wall. The white sheet is draped across the lower left and bottom of the frame. The person's arms are visible, with one hand pulling the sheet over the other hand.

THE EXPERT

BEHIND YOUR CARE

Dr. Nihal Affan

Known to many as Dr. Rasha, she is a London-based doctor, known for her artistry and bespoke aesthetic treatments. Her clinic in London has won multiple awards including “Best New Clinic” and “Best Clinic in The UK”. Her Signature treatments include Ponytail Lift, Polynucleotides, Botox, Fillers, and more.

THERAPISTS & NURSES

Our experienced beauty therapists combine advanced technical expertise with a personalized approach to deliver exceptional skincare and cosmetic treatments. With years of hands-on experience and a commitment to patient care, they ensure every treatment is performed with precision, comfort, and attention to detail.

Ghina

DHA Licensed Beauty Therapist

Ghina is a DHA-licensed Beauty Therapist specializing in results-driven skincare treatments, including HydraFacial, lymphatic face massage, peeling, and Dermapen microneedling. She takes a client-centered approach, designing customized treatment plans that address each individual's unique skin concerns and goals. Combining advanced techniques with genuine care, Ghina helps clients achieve visibly healthier, more radiant skin in a relaxing and professional setting.

Tiam

DHA Licensed Skin Therapist
& PMU Specialist

Tiam is a DHA-licensed Skin Therapist and Permanent Makeup Specialist dedicated to enhancing both skin health and natural beauty. She offers customized skin treatments alongside permanent makeup services, helping clients achieve long-lasting confidence through safe and professional aesthetic care.

OUR LASER THERAPISTS

Our laser therapists are highly trained professionals specializing in advanced laser hair removal and body contouring treatments. Combining technical expertise with a personalized approach, they deliver safe, effective procedures tailored to your individual skin and body goals.

Dedicated to your comfort and confidence, our team ensures every session is performed with precision and care, helping you achieve smoother skin, refined body contours, and long-lasting results in a professional and welcoming environment.

CLINICAL OFFERINGS

Discover a curated collection of advanced aesthetic and wellness solutions designed to address your unique concerns with precision and care. From facial rejuvenation and hair restoration to body contouring and wellness therapies, each treatment plan is tailored to enhance natural beauty, restore balance, and deliver refined, lasting results.

THE FACE

FACIAL

HydraClean Facial

A purifying treatment designed to deeply cleanse pores and remove impurities. Skin feels refreshed, clarified, and beautifully balanced with a healthy glow.

HydraLift Facial

A sculpting facial that helps lift, firm, and redefine facial contours. It improves skin elasticity while leaving the complexion smooth, plump, and youthful.

HydraBoost Facial

An intensive hydration ritual that replenishes moisture deep within the skin. Perfect for dull or dehydrated skin, leaving it soft, radiant, and revitalized.

Snail Mucin Facial

A regenerative facial infused with nutrient-rich snail mucin to repair and nourish the skin. It improves texture, boosts elasticity, and enhances natural radiance.

SkinCeuticals Facial

A science-driven facial powered by advanced skincare formulations for visible results. It targets specific concerns such as aging, pigmentation, and dehydration for healthier skin.

Esthederm® Deep Facial

A thorough cleansing treatment focused on detoxifying congested skin and refining pores. It removes buildup while restoring clarity, smoothness, and freshness.

Retinol Facial

An age-defying facial that promotes cell renewal and improves skin texture. It helps soften fine lines while revealing brighter, smoother skin.

Gentlemen's Facial

A customized facial designed specifically for men's skin and grooming needs. It deeply cleanses, soothes irritation, and restores a fresh, energized appearance.

Beard Hair Booster

A targeted treatment designed to support healthier, fuller-looking facial hair by revitalizing the skin beneath the beard. It improves scalp-like skin health, hydrates the follicles, and creates an optimal environment for stronger, healthier beard growth while enhancing overall skin quality.

AESTHETIC TREATMENTS

Skin Boosters

Microinjections of hyaluronic acid and bioactive compounds delivered into the dermis to improve hydration, elasticity, and skin quality.

Dermal Fillers

Injectable hyaluronic acid or calcium fillers used to restore lost volume, enhance facial contours, improve structural balance. Commonly used for lips, cheeks, jawline, chin, and nasolabial folds.

Acne Treatments

Targeted protocols designed to reduce active acne by controlling excess sebum, inflammation, bacterial overgrowth, and follicular congestion. Treatments may include medical-grade peels, lasers, injectables, or regenerative therapies depending on severity.

Scar Treatments

Advanced treatments designed to remodel scar tissue by stimulating collagen synthesis and improving skin texture. Particularly effective for acne scars, post-surgical scars, and textural irregularities.

Wrinkle Treatments

Designed to soften dynamic and static wrinkles caused by repetitive muscle movement and collagen loss. Treatments improve skin smoothness.

Pigmentation Treatments

Corrective treatments that target excess melanin production responsible for melasma, sunspots, and post-inflammatory pigmentation.

Fine Lines Treatments

Focused on early superficial lines caused by dehydration, photoaging, and collagen depletion. These treatments improve skin density, hydration, and elasticity for smoother skin.

Dehydration Treatments

Designed to restore water content within the skin barrier and improve moisture retention. Ideal for dull, tight, or rough skin lacking deep hydration.

Lip Boosters

Microinjections of hydrating actives or soft hyaluronic acid to improve lip hydration, texture, and smoothness. Ideal for enhancing softness and reducing dryness.

Botox

A purified botulinum toxin that temporarily relaxes targeted muscles to reduce dynamic wrinkles. Commonly used for forehead lines, frown lines, crow's feet, jaw slimming, and hyperhidrosis.

Saggingness & Skin Laxity Treatments

Advanced tightening treatments that stimulate collagen remodeling to improve firmness and elasticity. Ideal for mild to moderate skin laxity in the face, jawline, and body.

Sun Damage Treatments

Designed to repair UV-induced skin damage including pigmentation, uneven texture, collagen breakdown, and dullness. These treatments promote skin regeneration.

Mole Removal

A minor aesthetic procedure performed to safely remove raised or unwanted benign moles. The treatment prioritizes minimal scarring and optimal skin healing.

Biostimulator

Biostimulators are advanced injectable treatments that work by stimulating your body's natural collagen production rather than simply adding volume. They improve firmness and elasticity for natural-looking rejuvenation over time. Results develop progressively and can last up to two years, depending on the product used and individual response.

Dark Circles Treatments

Targeted treatments addressing pigmentation, volume loss, vascular visibility, or skin thinning beneath the eyes. Helps brighten and rejuvenate the under-eye area for a rested appearance.

Neck Line Treatments

Specialized treatments targeting horizontal neck lines caused by repetitive movement, aging, and collagen loss. Improves smoothness and softens visible creases.

Neck Rejuvenation Treatments

Comprehensive protocols designed to improve skin texture, firmness, and elasticity in the neck area. Helps restore a smoother, tighter, and more youthful neck contour.

Beard Hair Stimulation Treatments

Regenerative treatments designed to stimulate dormant follicles and improve beard density. Supports healthier hair growth, thickness, and follicular activity in patchy areas.

Peels

Controlled chemical exfoliation using medical-grade acids to accelerate cellular turnover and remove damaged surface layers. Improves acne, pigmentation, fine lines and texture.

Semi Permanent Make-up

Advanced cosmetic tattooing techniques to enhance the brows, eyeliner, and lips with natural-looking, long-lasting definition, reducing the need for daily makeup.

DERMATOLOGY TREATMENTS

Eczema / Dermatitis Treatment

Targeted care designed to calm inflammation, itching, and dryness associated with chronic or flare-prone skin conditions. Treatments focus on identifying triggers, restoring the skin barrier, and controlling recurrence. May include prescription topical therapies, medical-grade emollients, and tailored skincare protocols depending on severity and skin sensitivity.

Psoriasis Treatment

Medical protocols designed to control scaling, redness, and thickened, persistent plaques caused by accelerated skin cell turnover. Treatments aim to reduce flare-ups and improve long-term skin comfort and appearance. May include topical therapies, phototherapy, or systemic medications depending on severity, affected areas, and individual response.

Rosacea Treatment

Targeted treatments designed to reduce facial redness, visible blood vessels, and inflammatory bumps triggered by heat, stress, or sensitivity. Protocols focus on calming the skin and limiting recurring flare-ups. May include topical medications, oral therapies, or laser and light-based treatments depending on symptoms and severity.

Mole / Skin Lesion Assessment & Removal

Comprehensive evaluation of new, changing, or suspicious skin marks using dermoscopy to support early detection. Lesions requiring removal are treated with precise surgical or minimally invasive techniques, aiming for minimal scarring. Removed tissue may be sent for histological analysis to confirm diagnosis and ensure safety.

Skin Infection Treatment

Medical treatment for bacterial, fungal, and viral skin infections such as impetigo, cellulitis, ringworm, and cold sores. Accurate diagnosis guides targeted therapy to clear infection, relieve discomfort, and prevent spread. May include topical or oral medications depending on the type, location, and severity of infection.

Warts & Skin Tag Removal

Procedures designed to safely remove benign growths caused by viral infection or friction, including common warts, plantar warts, and skin tags. Techniques may include cryotherapy, cauterization, or minor excision depending on size and location. Treatment offers quick results with minimal downtime and low scarring risk.

LASER & RF TREATMENTS

CO² Fractional Laser

An advanced resurfacing laser that creates controlled micro-injuries to stimulate collagen renewal and skin regeneration. It improves acne scars, fine lines, pigmentation, texture, and skin laxity.

Splendor X Laser Hair Removal

A dual-wavelength laser combining Alexandrite and Nd technology for safe, effective hair reduction across multiple skin types. It precisely targets hair follicles for long-term reduction with enhanced comfort.

INFINI™ RF Microneedling

A radiofrequency microneedling treatment that delivers heat deep into the dermis to stimulate collagen and elastin production. It improves skin laxity, scars, wrinkles, pores, and uneven texture.

Venus Legacy™ Facelift

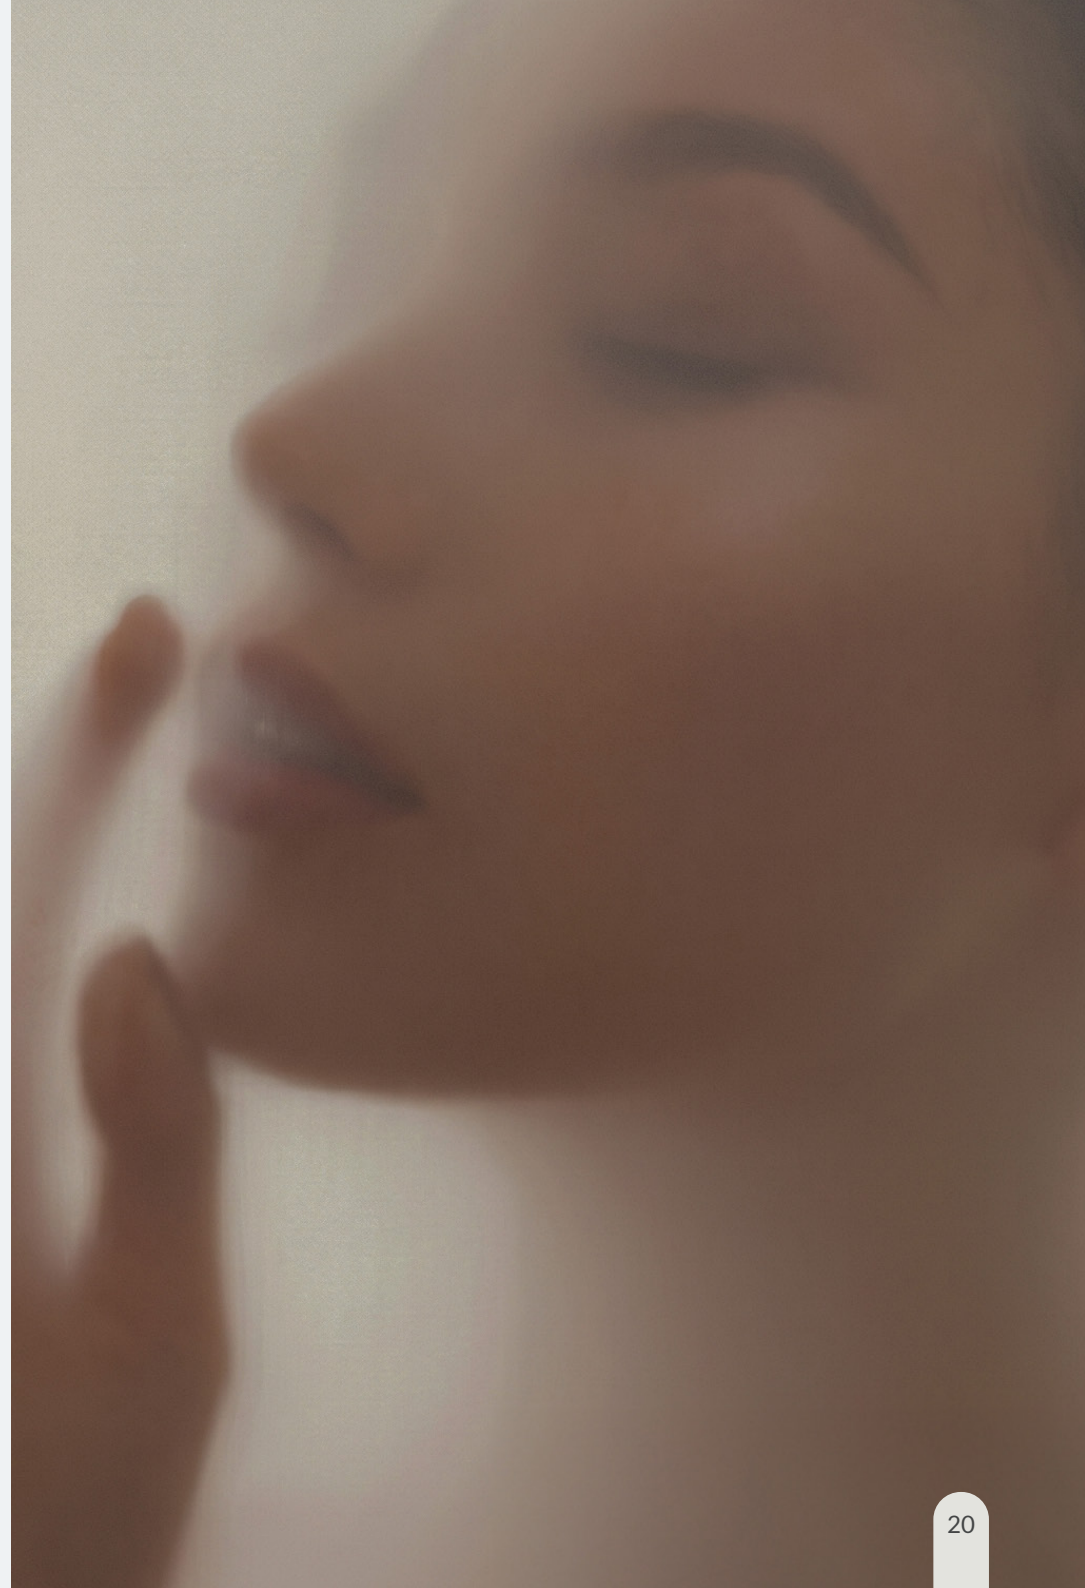

A non-invasive radiofrequency treatment that tightens skin and improves facial contours by stimulating collagen production. It helps lift, firm, and restore a smoother, more youthful appearance.

Spectra Q-Switch Laser

A high-performance laser that uses ultra-short pulses to selectively target pigment and unwanted particles in the skin. It is ideal for pigmentation, carbon peels, freckles, tattoo removal, hair bleaching, and rejuvenation.

Jett Plasma

(Eyelid lift, Skin Tightening, pigmentation correction, skin lift) An advanced plasma energy treatment that stimulates tissue contraction and collagen remodeling without surgery. It is highly effective for eyelid lifting, skin tightening, pigmentation correction, and facial lifting.

THE BODY

LASER & RF TREATMENTS

CO² Fractional Laser

An advanced resurfacing laser that stimulates collagen renewal through controlled micro-injuries.

Splendor X Laser Hair Removal

A dual-wavelength laser system designed for safe and effective hair reduction across different skin types. It precisely targets hair follicles to achieve long-term reduction with optimal comfort.

INFINI™ RF Microneedling

A radiofrequency microneedling treatment that delivers thermal energy deep into the skin to stimulate collagen remodeling. It improves skin laxity, scars, and overall body skin texture.

Venus Legacy™

A non-invasive RF treatment that targets cellulite, stubborn fat, and skin laxity by boosting collagen.

Spectra Q-Switch Laser

A high-performance laser that selectively targets excess pigment without damaging surrounding tissue. It is effective for body pigmentation, carbon peels, tattoo removal, and hair bleaching.

AESTHETIC TREATMENTS

Body Fillers

Injectable dermal fillers used to restore volume, improve contour, and enhance body proportions.

Body Botox

Botulinum toxin injections used to relax targeted muscles and reduce concerns such as muscle hypertrophy or body wrinkles. It can also improve skin smoothness and contour in selected areas.

Excessive Sweating Treatments

Targeted treatments designed to reduce excessive sweating by blocking overactive sweat gland signals.

Body Peels

Medical-grade chemical exfoliation designed to improve body pigmentation, acne, rough texture, and uneven tone. It accelerates cellular renewal for smoother, brighter skin.

Hand Fillers

Injectable fillers used to restore lost volume in the hands and reduce the visibility of veins and tendons.

Hand Skin Boosters

Microinjections of hydrating compounds designed to improve skin quality, elasticity, and hydration.

Pigmentation Treatments

Advanced corrective treatments that target excess melanin responsible for dark patches.

DERMATOLOGY TREATMENTS

Eczema / Dermatitis Treatment

Targeted care designed to calm inflammation, itching, and dryness affecting the arms, legs, torso, and other body areas. Treatments focus on repairing the skin barrier and reducing flare-ups. May include prescription topical therapies, medical-grade moisturisers, or wet wrap protocols depending on severity and skin sensitivity.

Psoriasis Treatment

Medical protocols designed to control scaling, redness, and thickened plaques commonly affecting the elbows, knees, back, and scalp. Treatments aim to slow skin cell turnover and reduce flare-ups. May include topical therapies, body phototherapy, or systemic medications depending on severity, affected areas, and individual response.

Mole / Skin Lesion Assessment & Removal

Comprehensive evaluation of new, changing, or suspicious moles and skin lesions on the body using dermoscopy to support early detection. Lesions requiring removal are treated with precise surgical or minimally invasive techniques, aiming for minimal scarring. Removed tissue may be sent for histological analysis to confirm diagnosis.

Skin Infection Treatment

Medical treatment for bacterial, fungal, and viral infections affecting the body, such as impetigo, cellulitis, ringworm, and folliculitis. Accurate diagnosis guides targeted therapy to clear infection, relieve discomfort, and prevent spread. May include topical or oral medications depending on the type, location, and severity.

Warts & Skin Tag Removal

Procedures designed to safely remove benign growths caused by viral infection or friction, including common warts, plantar warts, and skin tags on the body. Techniques may include cryotherapy, cautery, or minor excision depending on size and location, offering quick results with minimal downtime and low scarring risk.

Nail Infection Treatments

Targeted therapies designed to clear fungal and bacterial infections affecting the fingernails and toenails, causing discolouration, thickening, brittleness, or pain. Treatments aim to eliminate the infection and support healthy nail regrowth. May include antifungal topical solutions, oral medications, or laser therapy depending on severity and nail involvement.

THE HAIR

Hair Loss Treatments

Targeted treatments designed to reduce hair shedding and support healthier hair growth. They help improve follicle function and strengthen weakened hair roots.

Scalp Health Treatments

Advanced treatments focused on restoring scalp balance by addressing oiliness, buildup, dryness, and irritation. A healthy scalp creates the ideal foundation for stronger hair growth.

Bald Spots Treatments

Regenerative treatments designed to stimulate dormant or weakened follicles in patchy areas. They help improve density and encourage new hair growth in targeted spots.

Scalp Facial

A deep-cleansing scalp treatment that exfoliates, detoxifies, and nourishes the scalp. It removes buildup while improving circulation and overall scalp health.

Hair Filler

Microinjections of peptides, hyaluronic acid, and revitalizing compounds delivered into the scalp to nourish hair follicles. This treatment helps improve density, thickness, and hair vitality.

Preventative Treatments

Early intervention treatments aimed at slowing future hair thinning and preserving follicle health. Ideal for maintaining hair density before significant loss occurs.

Hair Supplements

Targeted nutritional support formulated to strengthen hair from within. They help provide essential vitamins, minerals, and nutrients needed for healthy growth cycles.

Hair Strengthening Treatments

Restorative treatments that reinforce weakened strands and improve hair resilience. They help reduce breakage while enhancing thickness and overall hair quality.

WELLNESS

NAD+ Drips

An advanced IV therapy that delivers nicotinamide adenine dinucleotide directly into the bloodstream to support cellular energy production. It helps improve mental clarity, energy levels, recovery, and healthy aging.

Multivitamin Drips

Intravenous nutrient therapy formulated with essential vitamins, minerals, and antioxidants for full-body wellness support. It helps boost immunity, energy, and overall vitality.

Customized Drips

Personalized IV infusions tailored to your specific wellness goals and nutritional needs. Each formulation is designed to support targeted recovery performance.

Hydration Drips

An IV therapy designed to rapidly replenish fluids and electrolytes for optimal hydration. It helps restore energy, improve recovery, and combat fatigue caused by dehydration.

Detox Drips

Specialized IV infusions formulated with antioxidants and supportive nutrients to aid natural detoxification pathways. They help reduce oxidative stress and support liver.

Blood Tests

Comprehensive diagnostic testing used to assess overall health, nutrient status, and key biomarkers. These insights help create more precise and personalized treatment.

STD Tests

Confidential screening tests designed to detect sexually transmitted infections accurately and early. Early diagnosis supports timely treatment and better long-term health outcomes.

HPV Shots

Vaccination designed to help protect against high-risk strains of the human papillomavirus. It supports long-term prevention against HPV-related health complications.

I.V. Stem Cells

Advanced regenerative therapy delivering stem cell-based infusions intravenously to support cellular repair, renewal, and overall vitality. Treatments aim to improve skin quality, reduce visible signs of ageing, and promote tissue recovery. Protocols are tailored to individual health goals following a comprehensive medical assessment.
